

The Teach Further Model

“The real world themed internship model allows students to experience the purpose of their content.”

The Purpose

Take the classroom one step further. Through the Teach Further Model, educators partner with local or national businesses or organizations to create dynamic, impactful, effective, and connected content by designing authentic learning opportunities through themed units dedicated to community engagement. Utilizing data supported best practice techniques, technology integration, and community leaders, teachers build a love for learning exceeding beyond the four walls of a traditional classroom. Created from STEAM/STEM, PBL, and other engaging exploration educational initiatives, the Teach Further Model creates a systematic framework for scalable practices. The Teach Further Model is a framework designed to support any existing instructional paradigm and process.

Objectives

1. Learners will gain an understanding of the key components of integrated learning models.
2. Learners will gain an understanding of the key components of the Teach Further Model.
3. Learners will understand how the Teach Further Model is a preferred strategy for meeting the key student engagement for real world application for learning.
4. Learners will be able to articulate other essential understandings associated with community partnerships.
